SUMMARY

Front-end developer focused on how people engage with a product, and on the business goals behind it. I came into engineering from financial audit at KPMG, so I think about the customer and the business first and I'm comfortable in regulated, money-handling products. Over four years I've shipped React and React Native apps to production end to end - closing the gap between business needs and technical architecture. Lately building AI-first products and weaving AI through my own work processes.

TECHNICAL SKILLS

Frontend React, Next.js, React Native, Tailwind CSS, shadcn/ui, MUI, design systems

Languages TypeScript, JavaScript, SQL, Python, HTML, CSS

AI / LLM LLM integration & prompt engineering, agent tool calling, agent-to-UI (A2UI) streaming, Google Gemini / Vertex AI; AI-assisted development with Claude Code & Cursor

Backend & Data Node.js, GraphQL, REST APIs, PostgreSQL, Supabase, Stripe (subscriptions & webhooks), WorkOS (AuthKit), Google Cloud (GCP)

Tooling & Practices Git, Vercel, Sentry, Playwright, CI/CD, feature flags, Core Web Vitals, end-to-end testing, multi-tenant architecture

EXPERIENCE

Senior Frontend Developer

CreatorsAGI · Bellevue, WA, USA — Feb 2025 – Present

- On Envoy Studio — CreatorsAGI's platform for deploying configurable AI agents on clients' own domains — architected the multi-tenant foundation: per-tenant authentication and onboarding (WorkOS AuthKit), tenant isolation, and dynamic subdomain/custom-domain routing in Next.js, plus a reusable component SDK and design system teams use to compose client-specific experiences.
- Built the generative-UI system at the core of the product: structured AI outputs become modular React components, streamed live to client sites over SSE via an agent-to-UI (A2UI) layer.
- Shipped M'adrono (ai.talmido.org) end to end, from prototype to production — an AI lesson-planning assistant live since Sept 2025 with 25,000+ queries from ~850 monthly active users.
- Drove platform performance and Core Web Vitals — cut Largest Contentful Paint ~97% (~6.5s → <200ms) across 25+ pages and reduced response latency ~40%.

Contract Software Developer — Independent

Toronto, Canada — Apr 2022 – Feb 2025

- Built the TypeScript/React front end for FormKiQ, an AWS-partnered document platform handling 50M+ documents — REST API integration and file upload/download via S3 presigned URLs.
- Built admin dashboards for mobile game operators, covering analytics plus tools to manage games, schedule live in-game events and configure in-game currencies.
- Built and shipped a React Native app end to end — gesture-based swipe interactions, animations, and local state — released on the Google Play Store.

Financial Statement Auditor

KPMG Canada · Baker Tilly Ukraine LLC — Dec 2018 – Aug 2022

- Worked daily with sensitive client and financial data — the compliance, identity, and risk context that customer onboarding and verification flows are built on.

EDUCATION & TRAINING

Education M.S. Accounting & Taxation, Odesa National Economic University.

Certifications Harvard CS50 · Meta Front-End Developer Professional Certificate.
